Monday Through Sunday, 12:00 a.m. To 6:00 a.m.	\$75.00

*Note: Per hour. Minimum labor charge is two hours.*

## **TECHNICAL NOTES**

**Resolution:** Numbers or letters can refer to the resolution a computer is running on its display.

**VGA** is the same as **640 x 480**

**SVGA** is the same as **800 x 600**

**XGA** is the same as **1024 x 768**

**SXGA** is the same as **1280 x 1024**

**Video Tapes:** Not all video tapes are alike. There is ½" VHS, the kind you have at home. There is SVHS which is the next step up in picture quality from VHS and needs a specific player. There is ¾" VCR, Beta and Beta SP. These are professional grade and require a specific player.

**Video Formats:** There are different formats for video around the world. In North America, NSTC is the standard. PAL or SEECAM are European formats and cannot be played on NTSC Machines. We support these formats, however meeting planners will want to check with international presenters about the format of any tapes so the proper player is in place.
